Gentlemen,

This letter is to inform you of my dissatisfaction with DirecTV regarding recent changes under SHVIRA which may effect some distant network subscriptions on April 7<sup>th</sup> 2005. I recently learned of these changes while viewing several known DBS forum web sites. While these changes may not affect my distant network subscription, because I have not received a post card from DirecTV, I am gravely concerned that future policy changes may impact my DNS status at a later date.

Under the old qualification SHVA qualification, I *never* had to request waivers for LIL because LIL is distant, less than Grade B, and simply not available in Estes Park, OTA analog or digital.

If after April 7<sup>th</sup> DirecTV determines that my less than Grade B signal location is only eligible for either Denver LIL or DNS, *my choice is to keep LA/NY DNS*. If I loose LIL, I will make sure that Denver network broadcast stations are made well aware of their loss of this viewer.

Regards

Marcus Snyder
